Hi!

I'm a web designer based in Portage, Wisconsin. Looking to do UI/Web design and development. I create user-focused and uncluttered interfaces using best practices. I'm an enthusiastic self-starter that has a passion for knowledge.

Experience

Spectrum Brands
Web Designer

2012 - Present

I'm on the Web Development team that helps build and maintain the sites for 30+ brands under Spectrum Brands. Brands such as: Rayovac, Remington Products, Farberware, Spectracide, Furminator, Nature's Miracle, and more.

I also help with the design and development of internal applications and micro-sites. Since starting there I've introduced responsive and mobile-first design, styleguides, and SCSS into our workflow. This has helped us tremendously in creating maintainable websites that serve hundreds of thousands of people efficiently.
